

# Interpreted Schematic Geology

Schematic map showing potential connection between Central/Main Cuello, Cuello North, Labio South and Labio West (albeit with fault displacements in places).

NOTE: Cuello open to the south and the Central Vein Zone is open to the north, particularly in the sand-covered area between the Ojo and Luna Deposits.

● LCD-87 Location of drill holes detailed in the Press Release dated 15 March, 2006.
